

BRINGING
METALS ALIVE

BACKED BY SOLID FOUNDATION

METKRAFT is the newest member of The Fisher Barton Group, world industry leaders in Materials Engineering.

Founded in 1973 as a lawn mower blade manufacturer, The Fisher Barton Group has grown and continues to deliver performance-enhancing, innovative products to a broad range of manufacturing needs. Since its founding, it has expanded beyond simple metal stamping and fabrication to a diverse set of products that cater to companies in several industries: agricultural, construction, corrugated, forestry, lawn and garden, medical, oil & gas, aerospace, power transmission and recycling.

Combining four decades of engineering expertise with industry-leading knowledge of the materials and processes, The Fisher Barton Group is always ready to provide solutions to the most difficult customer challenges, in order to deliver premium, longer-lasting products.

As the latest member of the Fisher Barton Group, METKRAFT has inherited over 100 years of expertise and experience in the materials engineering sector as we are able to tap into the strengths of each of The Fisher Barton Group companies to provide expertise and technology from start to finish.

Present in over 78 countries, The Fisher Barton Group comprises of:

Fisher Barton Specialty Products:

Specialists in wear resistant industrial components & assemblies, a premier supplier of heat-treated stampings, weldments, and coated knives and blades, used in the agricultural, construction, mining and biofuels industries.

Zenith Cutter:

Premium producer of high quality industrial knives & blades.

TST:

Thermal Spray Technologies innovative engineered coating solutions, provides thermal spray coating solutions for diverse applications.

Fisher Barton South Carolina:

The most diversified stamping facility in the southeastern United States, providing high-volume precision metal stamping, sheet metal fabrication, robotic welding and assemblies.

Accurate Specialties:

Largest manufacturer of centrifugally cast bronze bearings, worm gear, chill cast and proprietary spuncast composite gear blanks in North America.

Fisher Barton Blades:

World's leading manufacturer of lawn mower and other power blades.

Lineage Alloys:

Industry leader in manufacturing thermal spray coating powders.

Lund Precision Products, Ireland:

Europe's leading provider of high performance agricultural cutting systems.

And now METKRAFT.

The Fisher Barton Group supports each division with proper product research and development through its Fisher Barton Technology Center - a new, state-of-the-art materials research laboratory that houses a full range of the most up-to-date instruments for the microscopic, chemical and mechanical analysis of metals and other materials.

METKRAFT®

FOUNDED ON STRENGTH

The newest member in the Fisher Barton family, METKRAFT is destined to be the premier industrial blade and wear component manufacturer in Asia.

METKRAFT has the capacity to offer end-to-end solutions. Its current specialization includes; paper for both upstream (i.e. wood) and downstream (i.e. paper cutting, box cutting), packaging for paper, plastic, recycling, film, labels and corrugated materials.

With its global support, METKRAFT is able to manufacture its own branded products and engage in direct sales to end consumers. Offering a start-to-finish expertise and technology, METKRAFT is the one-stop solution for customized manufacturing.

METKRAFT's link to the subsidiaries of The Fisher Barton Group empowers it to give customers what they require; wear resistant industrial components and assemblies, high quality industrial knives and blades, thermal spray technology, metal stamping, research and product development in case they require specialized products.

METKRAFT is also ISO9001:2008 certified with state-of-the-art manufacturing capabilities, including through-hardened and induction heat treating, cryogenics, laser machining and CNC cellular manufacturing.

EXPERIENCE THE DIFFERENCE

METKRAFT is a comprehensive and innovative metal solutions provider with strengths no other Asian company can match.

- Superior Research and Development provided by The Fisher Barton Technology Centre that continuously studies the physical and chemical behavior of metals and raw materials in order to make great products.
- Varied and comprehensive product lines catering either directly to customers or OEMs.
- Specialty lines, customized, scalable solutions for specific needs. For customers needing a custom solution, we utilize the talent of our innovative product development team. We have many successful partnerships with large machine owners and dozens of OEMs in a variety of markets.
- Reputable customer base, trusted and used by leaders in their own industries.
