

# ENSURING RAZOR-SHARP PRODUCTIVITY

METKRAFT has the most reliable knives to break down materials for the plastics industry. As a supplier to the industry's leading OEM plastic and plastic recycling companies, we provide outstanding reliable product and services. Supported by our in-house engineering services, we will work together to achieve your business goals.

### Granulator Knives

Our knives are heat-treated for long wear and maximum toughness. We have knives for all popular models and can manufacture for any make and model.

### Shredders

Our shredder knives are manufactured using the highest quality steels to exacting specifications and tolerances of OEMs. We manufacture hundreds of thousands of blades each year for both OEM and aftermarket customers. Applying our metallurgical engineering innovations we offer a range of shredder blades that perform at increasing levels of improved wear resistance; including our latest patented tungsten carbide tipped model.

### Pelletizers

Our high-quality pelletizer knives process plastic pellet materials effectively and efficiently.

METKRAFT, with over 100 years of experience, has the expertise and quality products for all your knife and blade needs. Our highly knowledgeable staff will assist you with all our product offerings in order to give you the best knife for your application. Along with our competitive prices and impeccable after sales service, you are sure to get the best blades and the best value from us.
